EXAMINER'S ACTION

V100MM-00 12-1114

Serial No. 204505
Art Unit 123

The specification should be carefully revised in order to correct all typographical errors and omissions.

Claims 1, 25 and 28 are rejected under 35 U.S.C.

112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which the applicant regards as his or her invention. The term "fraction" is superfluous and should be cancelled. The terminology "Characterized in that" should be changed to ---wherein--- or other appropriate language. Claim 28 does not have antecedent basis since claim 24 on which it depends has been cancelled. Further claim 24 does not state for what purpose the composition is useful nor how much of the compound is present.

Claims 1, 25 and 28 are rejected under 35 U.S.C.

103 as being unpatentable over Lindall et al., Fussi or
Schmer, Takacs et al or Choay et al. Although, the
invention is not identically disclosed or described as
set forth in section 102 of Title 35 U.S.C., the
differences between the subject matter sought to be
patented and the prior art are such that the subject
matter as a whole would have been obvious at the time
the invention was made to a person having ordinary
skill in the art to which said subject matter pertains.
Each of the references shows the separating of heparin

3

Art Unit 123

compounds from materials containing same and/or separating one heparin fraction from another. The instant product and process of separation as well as the pharamceutical composition are not deemed to patentably distinguish over the disclosure of the references.

Applicants are reminded that the same subject matter is being claimed in co-pending application Ser. No. 301,611.
